

SOFTWARE FOR MANAGEMENT OF ART COLLECTIONS AND ART ASSETS

Using our software makes it easy to:

- Put together inventories for all your collections, be they historical, cultural or artistic.
- Catalogue all the data about the works of art, artefacts and antiques e.g. artist, style, technique, title, dimensions, origin, identification image or number .
- Manage all the information on the works, artists, events and any other elements relating to your collections.
- Register and review all the information pertaining to collections or pieces in relation to auctions, publicity, press reviews etc.
- Manage the accounts related to the collections or pieces such as invoices, delivery notes and budgets.
- Input and manage information relating to artists, clients, partners and suppliers you may work with.
- Manage your information available through your website, the internet in general, publicity materials, media channels etc.
- Define parameters available for research or general information requests within your database.
- Create new account managers and define individual accessibility.
- Diarise events.
